

National Technical University of Athens (NTUA)

International e-learning Postgraduate Course in Water Resources & Environmental Management National Technical University of Athens (NTUA) - Department of Water Resources and Environmental Engineering

In September 2012 the sixth cycle of the Educate Postgraduate Course in Water Resources and Environmental Management will be starting.

Educate is an international e-learning postgraduate programme in Water Resources and Environmental Management organised by four leading Universities in the South-Eastern European region. The Consortium includes the National Technical University of Athens, the University of Belgrade, the Technical University of Civil Engineering of Bucharest and the University of Ljubljana. The course is a flexible distance learning programme based on e-learning. All educational material, lectures and tutorials are delivered in English. The Academic Programme is organised as a pedagogic continuum and includes four Thematic Areas and a research thesis. Students can follow the entire postgraduate course or alternatively they can follow selected course elements, such as Thematic Areas and/or Modules according to their needs. In addition to their academic work, students will develop a variety of learning skills and competencies, such as research, communication, and other professional skills, learn to orient themselves in European networks of academic institutions and elaborate on relevant career objectives and strategies.

Successful completion of the entire postgraduate course (2 years) leads to the award of the Diploma of Academic Specialization in Water Resources and Environmental Engineering from the Faculty of Civil Engineering, University of Belgrade. The degree awarded by the University of Belgrade is recognised by the National Academic Recognition Information Center of Greece (D.O.A.T.A.P.). In case that only specific modules are selected students receive a certificate that includes the corresponding ECTS credits obtained upon successful completion of the selected modules. The course is addressed to an international audience of graduates in Engineering. It is targeting recent university graduates and professionals from the public or private sector seeking specialisation in the field of Water Resources and Environmental Management.

For further information on the course, the application procedure and application deadlines please visit the course website: <http://www.water-msc.org>.
